

TurfMend® Micro-Mulch No Seed

TURF DETAILS

This product is seedless, giving you the flexibility to add any seed of your choice for your project or use the product without seed altogether.

BENEFITS

TurfMend Micro-Mulch combines USGA specification green sand with TurfMend granulated micro-compost (100 SGN), resulting in exceptional moisture retention and seed germination capabilities.

COVERAGE

A 50lb bag can cover up to 415 sq ft - this product is also available in 2000lb totes.

PRODUCT OVERVIEW

TurfMend Micro-Mulch offers you the flexibility to introduce your chosen seed, guaranteeing reliable results when tending to divots or rejuvenating bare areas. Crafted exclusively from premium-grade components, this product maintains the ideal moisture level, ensuring compatibility with both drop spreaders and rotary spreaders. Moreover, it efficiently accelerates the recuperation of warm-season turf during transitional shoulder seasons and has demonstrated its consistent performance in enhancing divot recovery for Zoysia grass throughout the entire growing season.
